# HOW TO TALK TO AI

@wambugu\_ai

# PROBLEM STATEMENT

Most people type random stuff into AI. Then complain it "doesn't work"

# RULE 1 – GIVE CONTEXT

AI works better when it knows the role.  
Example: "Act as my personal tutor in economics" vs "Explain economics."

# RULE 2 – BE SPECIFIC

Vague prompt = vague answer.  
Instead of: "Write me a blog."  
Try: "Write me a 500-word blog for beginners about AI in education, using simple language."

# RULE 3 – SHOW EXAMPLES

AI learns from examples in the prompt.  
Example: "Here's a style I like [paste sample]. Write my version in the same tone."

# RULE 4 – USE CONSTRAINTS

Tell AI what not to do.  
Example: "Explain blockchain in 5 bullet points, no jargon, under 100 words."
